

CLIMALED

Spots

This lighting profile with pre-mounted LED spotlights provides the ideal lighting for your veranda or canopy and is mounted discreetly under the rafters. The long-lasting LED spotlights produce a warm white light that can be dimmed using the remote control, enabling you to create the required lighting ambience, from soft atmospheric to bright functional lighting. These pre-cabled lighting profiles (3 spotlights per profile) can be installed very easily and quickly.

A lighting set Climaled spots includes:

- two or more colour coated aluminium profiles with 3 built-in LED spots
- a transformer 230/24V DC 30W or 60W depending on the number of spots
- a remote control
- the wiring between the spots and the transformer
- the assembly accessories

Depth D (mm)	Colour	Number of lighting profiles

The standard colours are white (RAL 9010) and anthracite structured (RAL 7016 ST) and the trend RAL colours of Climalux

* If you order Climaled without a canopy, a price surcharge will be applied: price on request

Stripes

An LED light strip can also be integrated into the gutter. This LED lighting emits a beautiful, soft and pleasant warm white light.

A lighting set Climalux strip includes:

- one colour coated aluminium profile GDGL (Climalux)
- one LED strip 12V (60 LEDs /m)
- a transformer 230/12V DC 30W
- the wiring (6m) between the LED strip and the transformer
- the assembly accessories
