

CLIMAGLIDE

NEW

Climaglide is a profile system for glass sliding elements and is custom-made. This system, which is delivered together with your veranda roof, provides you with protection from wind and rain, and thus represents significant added value for your roof.

The profiles' elegant, contemporary look contributes to increased aesthetics. The aluminium profiles require minimal maintenance, are coated in accordance with the Qualicoat standard, and are available in all RAL colours and structured coatings. In combination with 8mm tempered glass (not supplied by Skylux), Climaglide ensures a tough and safe system.

Climaglide is a sliding glass partition for single glazing. This system can be locked on the inside, and provides some protection against wind and rain. The sliding elements can be slid open to 1 or 2 sides, creating a large opening. Or you can choose a carrier system which allows you to slide each glass panel separately. Climaglide is suitable for closing a patio roof without thermal break like the Climax Panorama, Climalux and Climalite. The lower rail (CGB) has 3, 4 or 5 tracks, is completely pre-drilled and delivered to size.

Optional accessories:

- screw-on handles D65/50 made of anodised aluminium
- set of 2 self-adhesive handles made of anodised aluminium, with a small cleaning cloth
- glue for attaching the handles

System	Width in mm						
	2000	2400	2800	3200	3600	4000	4400
3 tracks 2 glass elements	€ 962	€ 976
