HAKKIMIZDA
ABOUT US

İnsanoğlu varoluşundan beri doğanın bir parçası olup da ait olduğu doğayı kendi yaşam gereksinimlerinin üzerinde değişim göstermesi için zorlayan tek varlıktır. Ama ne yaparsa yapsın doğası gereği doğala duyduğu ihtiyacı giderme dürtüsü de taşımaktadır. İnsan sağlığı için gerekli olan bu ihtiyaç günümüzde lüks tüketime dönüşmüş durumdadır. Doğal ürünlerin lüks için kullanılmasındaki en gözde materyal nefes alması ve yaşamaya devam etmesi nedeniyle ahşaptır. Günümüzde özellikle mekânsal lüks ihtiyacını karşılamak için çok sayıda ağaç kesilmektedir.

Bu noktadan yola çıkarak 1985 yılından beri ahşapla olan tanışıklığımızı ve iletişimimizi geliştirmek, daha az ağaçla daha çok ürün elde edebilmek, ahşabı tüm doğallığıyla gerek iç gerekse dış mekânlardaki en zorlu şartlara dayanmasını sağlayacak şekilde kullanabilmeyi hedefledik. Çünkü bize göre ağaç sadece ilaç için kesilmeliydi. Bugün; 30 yılı aşkın bir süreden gelen ahşap ustalığımızı teknoloji ile birleştirerek, dünyada eşi benzeri olmayan ve %100 doğal ağaçtan elde ettiğimiz teknolojik ahşabı Technowood markasıyla dünyaya sunmanın gururunu yaşıyoruz.

The humankind, being the part of the nature since the beginning of his existence, is the only creature who compels nature to which he belongs, to show a change upon his own life requirements.

However, no matter what he does, he also has the motive of satisfying the need that he feels towards the natural, intrinsically. In our day, this need which is necessary for human health, has turned into a luxury consumption. Wood is the most favourite material in the usage of the natural products for luxury, due to its breathing and continuing to live. In our day, so many trees are being cut for meeting the need of spatial luxury.

Starting from this point, since the year of 1985, we aimed to develop our acquaintanceship and communication with wood, to obtain more product with less tree, to be able to use the wood with all its naturalness in both interior and the exterior spaces in a way providing it to endure against the most compelling conditions. Because, according to us, the tree should have been cut for only medicine. Today; we're living the pride of presenting the technological wood, which is unique and which we have obtained from 100% natural trees, under the trademark of Technowood.

TECHNOWOOD NEDİR?
WHAT IS TECHNOWOOD

Technowood, özellikle zorlu dış mekân koşullarına dayanıklı olan materyallerin gerçek ahşap ile kaplanmasıyla ortaya çıkan bir ürün gamını temsil etmektedir. Temel olarak 2 farklı materyal kullanılmaktadır; alüminyum profiller/levhalar ve CTP (cam elyaf takviyeli polyester) profiller/levhalar.

Technowood represents a product range, emerged by coating the materials resistant to especially the compelling external spatial conditions with real wood. Basically, 2 different materials are used; the aluminium profile/sheets and GRP (glass fibre-reinforced polyester) profiles/sheets.

NEDEN TECHNOWOOD?
WHY TECHNOWOOD

Technowood olarak, 0,5 milimetre kalınlığına getirilen FSC belgeli, % 100 doğal ahşabı, alüminyum ve CTP materyalleri üzerine kendi geliştirdiğimiz özel bir teknikle kaplayarak hem doğal ahşabın mukavemetini artırıp ömrünü uzatmakta hem de kullanım özgürlüğü sağlamaktayız.

Bu özel teknikteki alüminyum ve CTP kullanımı sayesinde masif ahşabın yapılar üzerinde oluşturduğu ekstra yükü bertaraf etmiş; doğal ahşabın dönmesini, çalışmasını ve çatlamasını engellemiş oluyoruz.

As Technowood, we both extend its life as increasing the resistance of natural wood and provide usage freedom as coating the 100% natural wood with FSC certificate, brought to a thickness of 0,5 mm, on aluminium and GRP materials with a special technique that we have developed.

By means of using aluminium and GRP in this special technique, we have inhibited the extra load which the massive wood creates on the structures, deflection, working and cracking of the natural wood.

Tasarımcıların en büyük sıkıntısı olan; 4 metre üzerinde tek parça ahşap bulunamaması sorununu, 12 metreye kadar tek parça Technowood ürünü üretebilme kabiliyetimizle aşarak tasarım özgürlüğü yaratmaktayız. Aynı zamanda gizli vidalama sistemimiz ile estetik kaygısını da ortadan kaldırmaktayız.

By overcoming the problem of unavailability of single piece of wood over 4 meters, which is the greatest difficulty of the designers, by our capacity of producing single piece Technowood product up to 12 meters, we are creating a design freedom. At the same time, we are eliminating the aesthetic concern by means of our hidden screwing system.

Gerçek ağaçtan elde ettiğimiz 0,5 mm kalınlığındaki %100 doğal ahşap üzerine uyguladığımız Technowood'a özel olarak üretilen 3D verniğimiz sayesinde en zorlu koşullarda bile doğal ahşap görünümünü koruyup, bakteri ve mantar oluşumunu engellemenin yanı sıra; bakım sürelerini uzatarak işletme maliyetini düşürmekte, ahşabın yangına karşı direncini de arttırmaktayız.

By means of our 3D varnish, specially manufactured to Technowood, which we obtain from real trees and apply on 100% natural wood with a thickness of 0,5 mm, we decrease the operating cost by extending the maintenance periods and also increase the resistance of the wood against fire as well as preserving the natural wood looking of it even in the most compelling conditions and inhibiting bacteria and fungi.

En çok gururlandığımız, Technowood'un doğuşuna vesile olan ve tercih edilmesini gerektiren en önemli neden ise dünya için bıraktığımız mirastır…

The most important reason, which we feel proud and which has leaded the rising of Technowood and requires its being preferred, is the legacy which we leave for the world…

TECHNOWOOD DÜNYA İÇİN NE YAPTI?

WHAT HAS TECHNOWOOD DONE FOR THE WORLD

Gelişen dünya ve değişen nüfus artışı göz önüne alındığında doğal kaynakların fazla uzak olmayan bir gelecekte hızla tükeneceği bilinen bir gerçektir. Sanayileşmenin artması ve tüketim toplumu oluşturulmasının etkisiyle son yarım yüzyılda dünya üzerindeki ormanların önemli bir bölümü kaybedilmiş bulunmaktadır. Dünyanın ciğerleri olan ağaçlar çeşitli özellikleriyle insanlık için ilaç görevi de görmektedir.

Technowood olarak, ahşabın bir lüks aracı olarak değil, ihtiyaç ve ilaç için kesilmesi taraftarıyız. Ürettiğimiz teknolojik ahşap sayesinde de insanoğlunun yaşam alanlarında ihtiyaç duyduğu doğallığı ve sağlığı bulmasının yanı sıra; ağaç kesimini minimuma indirmeyi de başardık. Bugün masif ağaç ile yapılan herhangi bir projede kullanılan ağaç miktarının sadece

%2 'sini kullanarak aynı projeyi aynı doğallıkta ve daha uzun ömürlü olarak tamamlayabilmekteyiz.

When the developing world and varying population growth are taken into consideration, it is a known fact that the natural resources shall be depleted rapidly in the not so distant future. With the increase in industrialization and the effect of creating a consumption society, in the Last Half Century, an important part of the forests on earth have already been lost. The trees, which are the lungs of the earth, also function as medicine for humanity with their various features.

As Technowood, we are in favour of cutting the wood as not a means of luxury but for a need and medicine. And due to the technological wood we produce, besides the human being's finding the naturalness and health which he needs in his living spaces; we have also reduced the tree cutting to minimum. Today, we could complete the same project in the same naturalness and as more long-lived by only using

2% of the amount of trees that are used in any project which is made by solid wood.

DESIGN ARCHITECTURE SYSTEMS

Bu sayede mekân tasarımı için kesilecek olan her 100 ağaçtan 98'ini kesilmekten kurtarmaktayız. Yetişmesi yüzlerce yıl alan ormanlarımızı kurtararak; çocuklarımız, geleceğimiz ve dünyamız için en değerli mirası bırakmaktayız.

By this means, we are saving 98 of every 100 trees which shall be cut for the design. As saving our forest which live for hundreds of years; we are leaving the most valuable legacy for our children, our future and world.

Dünyaca ünlü belgesel kanalı Discovery Channel'ın Technowood ile ilgili hazırlamış olduğu özel bölümü Qr kodu okutarak izleyebilirsiniz.

You can watch the special part about Technowood, which is prepared by the worldwide known documentary channel, Discovery Channel, by scanning the Qr code.

MİMARİ ÇÖZÜMLER
ARCHITECTURAL SOLUTIONS

Technowood olarak, her projeye özel olarak ürettiğimiz ürünler yaptığımız işin elle tutulur olduğu kadar, sadece gözle görülür kısmını da oluşturmaktadır. İşin görünmeyen kısmında ise profesyonel çözümler sunduğumuz mimari ekibimizin büyük katkısı bulunmaktadır.

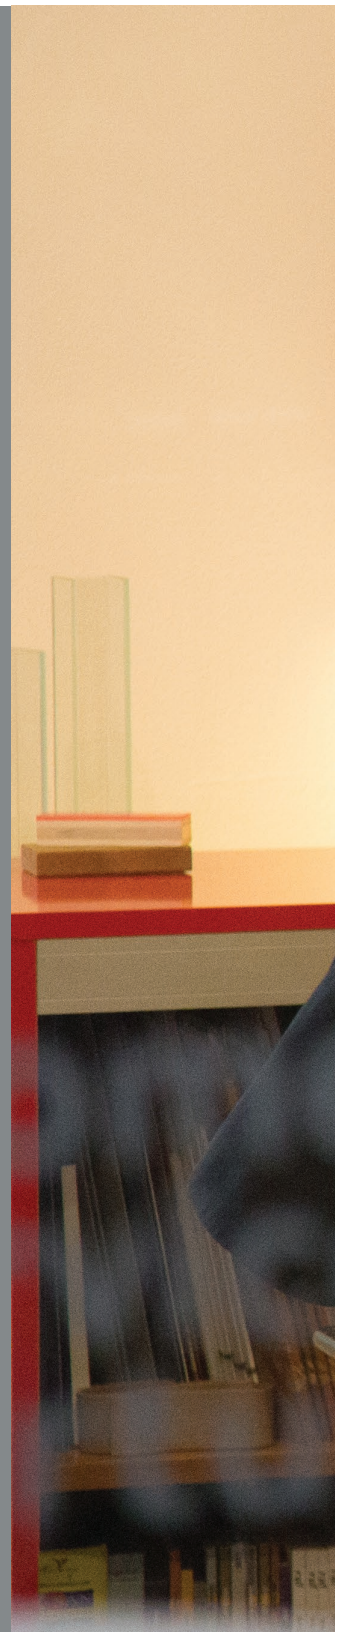
As Technowood, the products we have manufactured, consist of only the visible part of the job, we are doing as well as the tangible part of it. And in the invisible part of the job, our architectural team, with which we are presenting professional solutions, has a great contribution.

Mimari ekibimiz gelen talep doğrultusunda hazırlanan projeye en uygun şekilde nasıl cevap verilebileceğini, projenin öngörülemeyen noktalarının nasıl çözümlenebileceğini en ince noktasına kadar inceleyerek üretim sürecini şekillendirmektedir.

Our architectural team shapes the manufacturing process by examining down to the last detail as well as how could the most appropriate response could be given to the prepared project in line with the demands that are received and how the unforeseen points may be solved.

Hazırlanan üretim planı doğrultusunda projede kullanılacak ürünlerden oluşan numunelerin bulunduğu özel bir kit hazırlayarak müşterilerimizin proje ekibine sunuyoruz.

By preparing a special kit in which the samples consisting of the products that shall be used in the project, are found in line with the prepared manufacturing plan, we present it to the project team of our customer.



ÜRÜNLER
PRODUCTS

İki temel materyal üzerine (alüminyum ve CTP) kapladığımız %100 doğal ahşaba sahip ürünlerimizin tümünü kendi fabrikamızda hazırlamaktayız.

We are preparing all of the products having 100% natural wood, which we coat on two basic materials (aluminium and GRP) in our own factory.

TECHNOWOOD'UN FARKLARI / AVANTAJLARI
TECHNOWOOD'S DIFFERENCES / ADVANTAGES

Technowood

- %100 doğal ahşap kaplamadır.
- A2 Sınıfı Yangın Direnci Sertifikası vardır.
- 3 Boyutlu verniği sayesinde yağmurda kendi kendini temizler, doğal ahşap görüntüsünü kaybetmez.

Technowood

- %100 Natural wood veneer.
- Has a Certificate of A2 Class Fire Resistance.
- By means of its 3 Dimensional Varnish, it cleanses itself in rain, it does not lose its natural wood looking.

Ahşap

- %100 doğaldır.
- Kolay tutuşur ve yangın riski yüksektir.
- Suya ya da kimyasala maruz kaldığında eğilip bozulabilir.

Wood

- The wood is %100 natural.
- Easy Flammable and its fire risk is high.
- May be bent and deteriorated when it is subjected to water or chemical.

Technowood

- Dönmez, çalışmaz, çatlamaz.
- Böcek ve mantar oluşturmaz. Toksik değildir.
- En zor şartlara karşı (çöl vb.) dayanıklılığı yüksektir.
- Bakım süreleri uzun ve bakımı kolay olduğundan, bakım maliyetleri ucuzdur.

Technowood

- It doesn't bend, lose stability and crack in process of time.
- It does not generate insect and fungi. It's non-toxic.
- Its resistance against the most compelling conditions (desert etc.) is high.
- Because of the longness of the maintenance periods and the easiness of their maintenance, the maintainance costs are cheap.

Ahşap

- Döner, çalışır ve zaman içerisinde çatlama yapar.
- Böcek ve mantar istilasına karşı açıktır.
- Dış etmenlerden kolay etkilenir, her şartta veya iklim koşulunda kullanılamaz.
- Bakım süreleri çok kısadır bu nedenle bakım ve işletme maliyetleri yüksektir. Bakımı zordur.

Wood

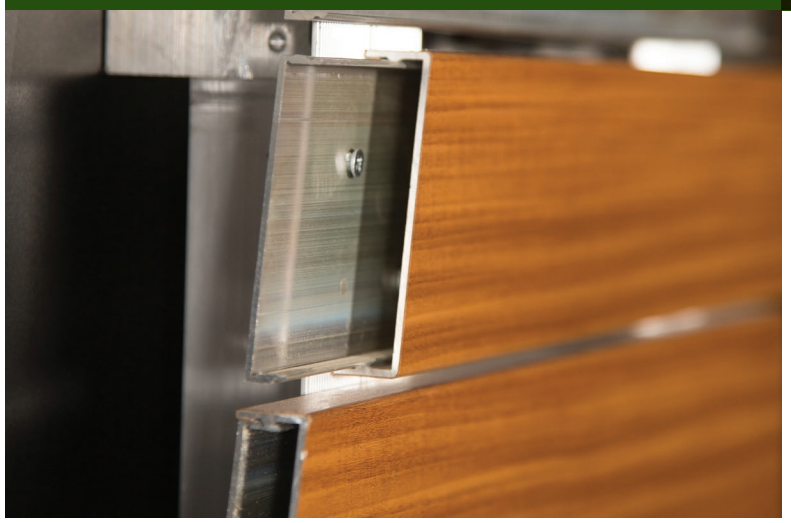
- It bends, loses stability and cracks in process of time.
- It is open to the insect and fungal invasion.
- It is affected from the external factors easily, it cannot be used in every climatic condition.
- Their maintenance periods are too short; for this reason, their maintenance and operating costs are high. Its maintenance is difficult.

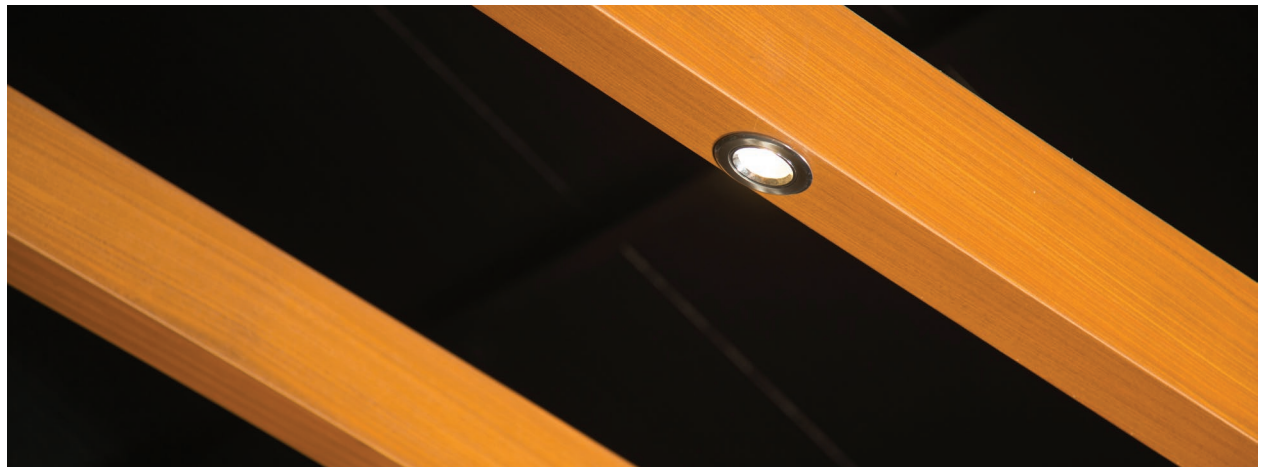
Technowood

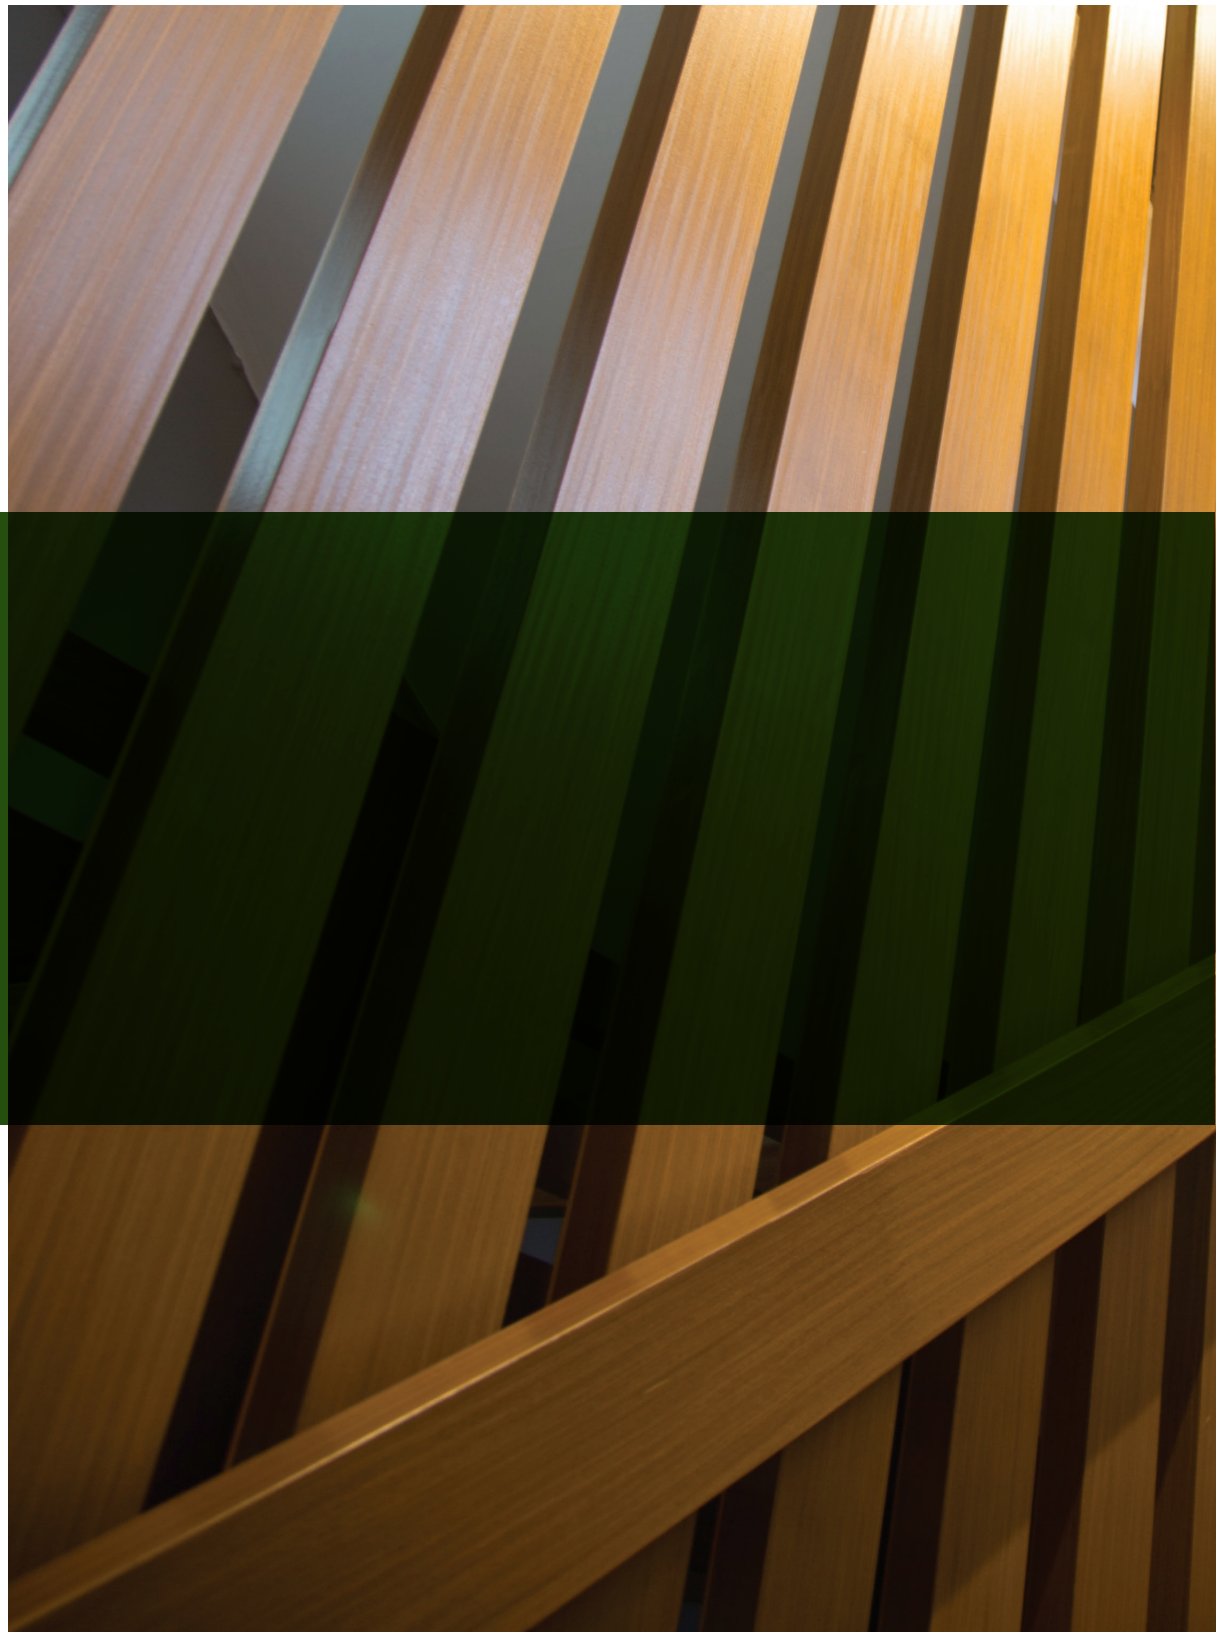
- Ömrü uzundur ve garantilidir (25 yıl). Gizli bağlantı elemanları sayesinde estetik görüntüyü bozmaz. Esnektir, istenilen şekle sokulabilir.
- Hafiftir, yapılara yük bindirmez.
- 12 metreye kadar (kutu profillerde) tek parça ürün üretilebilir.
- Hızlı üretilir ve hızlı teslim edilir; montajı kolaydır.

Technowood

- It is long lived and has guarantee (25 years). By means of its hidden joint elements, it does not spoil the aesthetic image. It is flexible, it can be put into the desired shape.
- It is light, it does not impose burden on the structures.
- It could be manufactured as one single piece up to 12 meters (box profiles)
- It is manufactured rapidly and it is delivered rapidly; its application is easy.







Ahşap

- Estetik kaygı yaratır, bağlantı noktaları görünür ve ömrü kısadır.
- Ağırdır, yapıları yorar.
- 4 metreden daha uzun parça bulmak zordur.
- Üretim ve teslimat süreci uzun, montajı meşakkatlidir.

Wood

- It has an aesthetic concern, its connection points are visible and it is short lived.
- It is heavy, makes the structures worn out.
- It's very hard to find a piece which is longer than 4 meters.
- Its manufacturing and delivery process is long, its application is toilsome.
