0° - 65° Installation to the wall
 0° - 65° Installation to the ceiling

SPECIFICATIONS

Semi-cassette awning Semi-cassette terrace awning APOLLO is characterized by its strength and a sophisticated design. Its components are made of a special aluminium alloy and mechanisms are powder-coated – components painted in this way have a smooth, durable and surface protective coating.

APOLLO awning has many advantages, one of them - includes further protection from the sun when it is staying low on the horizon – an elegant valance of a fabric at the front of the awning. It is extremely easy to install the awning, while a lateral drainage system facilitates its maintenance. By installing additional wind sensors, you will be able to ensure the safety of the awning on windy days.

The awning is available in 4 colours: white, silver, brown and anthracite.

- Custom-made in Lithuania.
- Maximum width – 6 m, maximum depth – 3.5 m.
- Aluminium arms are connected by a chain at hinges, so such a construction is extremely durable. Vibration-absorbing rubbers are used at the joints.
- With a valance which in turn protects from sunlight and provides elegance.
- The awning can be installed to the wall or ceiling.
- Possibility to adjust the angle of inclination, choose automatic or manual control
- By choosing an electric drive, the awning can be easily controlled.
- Wide choice of additional accessories (motor with an emergency opening, remote control, wind sensor).
